INFORMATION DISCLOSURE STATEMENT

“No item of information contained in this information disclosure statement was cited in a communication from a foreign patent office in a counterpart foreign application, and, to the knowledge of the person signing this statement after making reasonable inquiry, no item of information contained in the information disclosure statement was known to any individual designated in Section 1.56(c) more than three months prior to the filing (5/14/2004) of the information disclosure statement. These new patents were found during searches done in April 2004.”

U.S. Patent 5,757,925 (Faybishenko), filed Jul. 23, 1996, teaches methods associated with a secure platform-independent application server with a GUI client using Java, ActiveX or some other intelligent client technology. The present invention can use these client technologies as well as HTML in the presentation of its client interfaces, moreover in a manner that does not require continuous server interaction. It is compatible with, but does not require, a secure login procedure, allowing use by unregistered users.

U.S. Patent 5,815,683 (Vogler), filed Nov. 5, 1996, teaches an access facilitator for connecting remote clients to a tool server. Vogler does not disclose a session ID or “Unique Identifier” separate from the internetworking address of the client and requires a similar login procedure as Faybishenko with attendant limitations on utility overcome by the present invention.

U.S. Patent 5,907,621 (Bachman, et. al), filed Nov. 15, 1996 teaches the use of a page-embedded secure token (session key) to maintain session continuity. This is similar to, but not the same as the "verifiable Unique Identifier" mechanism described in the present invention.

Dear Sir / Madam:

Please find attached a statement belatedly filed to accompany an information disclosure (PTO/SB/08a) filed 5/6/2004 for pending application 09/287,478, per 37CFR1.97(c)(1) and 37CFR1.97(e)(2). A good faith attempt was made to comply with Section 1.98, but the applicant was unaware of the necessity of an accompanying statement. The applicant requests that this additional time be granted to enable full compliance.

The disclosure statement was originally filed in response to an office action marked NON-FINAL in applicant's receipt and in the response summary, but procedurally entered as FINAL and then reversed.

Thank you,

Chris Rode
